RE: I-129 Petition for L-1A Classification
Transferee: Ms. Catherine GAUJACQ

Dear Sir or Madam:

This letter is written in support of the petition of Electricité de France International North America, Inc. for an L-1A nonimmigrant visa on behalf of Ms. Catherine Gaujacq, for the position of President of Electricité de France International North America, Inc. The transferee will undertake a temporary assignment with Electricité de France International North America, Inc. She is currently employed by Electricité de France at its Nuclear Power Plant in Penly, France. Ms. Gaujacq will report on her activities to senior-level management at Electricité de France, in France.

Electricité de France International North America, Inc. is requesting a period of employment authorization of three years, from July 1, 2000 to June 30, 2003. During this assignment, Ms. Gaujacq's level of compensation will be \$110,000 per year. She will continue to be remunerated by Electricité de France in France. Ms. Gaujacq will be based in the United States at Electricité de France International North America, Inc.'s main office in Washington, D.C. It is anticipated she will travel frequently to other Electricité de France International North America, Inc. offices and affiliated U.S. power plants. Both Electricité de France International North America, Inc. and Ms. Gaujacq understand the temporary nature of the assignment.

The Petitioner and the Corporate Relationship

Electricité de France International North America is owned by Electricité de France, a state-owned utility which is responsible for the generation, transmission and distribution of electricity in France. In 1998, Electricité de France counted 30 million customers in France and more than 15 million customers outside of France. Electricité de France's total output in France during 1998 came to 460 billion kilowatt-hours.

INS/Vermont Service Center

April 24, 2000

Page Two

Since 1989, Electricité de France has developed in international policy leading to the opening of offices throughout the world, including the establishment of a number of subsidiaries in several countries. In the electricity industry, Electricité de France has been recognized as an important actor on a world-wide basis. An essential part of the Electricité de France mission is to promote cooperation between electrical utilities and other organizations in the field of electrical energy production in the areas of scientific research and development. In recent years, it has become increasingly important to establish close relationships between electrical utilities in order to further advance the mission of generating electricity with minimum risks to the environment and maximum service to customers.

Electricité de France and its subsidiaries are continually striving to advance the level of technical and scientific communication among energy providers on a global basis in an effort to further develop clean, safe, and efficient forms of energy. This promotion of research and development includes the establishment of collaborative projects between the subsidiaries of Electricité de France and other organizations, including U.S. utilities. In addition, Electricité de France's practice is to rotate its managers on an international basis. In keeping with this practice, Electricité de France has decided to bring to the United States on a temporary basis a high-level manager who has acquired a great deal of experience and responsibility within the Electricité de France organization.

The U.S. Position to be held by the Transferee

Ms. Gaujacq will fill the position of President of Electricité de France International North America, Inc. As the top-ranking executive of Electricité de France International North America, Ms. Gaujacq will direct all business activities of the organization. She will review administrative and personnel decisions and coordinate the work of outside contractors who provide services to meet the needs of Electricité de France International North America, Inc. Perhaps most importantly, as President, Ms. Gaujacq will work in close collaboration with leaders of U.S. electrical utilities, building and strengthening ties between the U.S. and French energy industries. This function of Ms. Gaujacq's position is key because the exchange of information between Electricité de France and U.S. utility companies will directly benefit the U.S. energy industry. Ms. Gaujacq will be charged with explaining the policies, experiences, and goals of Electricité de France to U.S. energy executives and governmental organizations. She will play a critical role in defining the different avenues to be pursued by Electricité de France in cooperation with the U.S. energy industry in pursuing collaborative research and development projects at a highly advanced level. Clearly, only an experienced Electricité de France insider could successfully fill this position. Ms. Gaujacq, an employee of Electricité de France for 20 years, and a high-level executive familiar with company policies and operations at several Electricité de France electrical power plants, is well qualified for the job.

The Foreign Positions Filled by the Transferee

Ms. Gaujacq has been employed by Electricité de France since 1980. Her twenty years of experience have included several managerial positions of varying responsibility. Since 1994, Ms. Gaujacq has held the important position of Site Vice-President and General Manager of the Penly Nuclear Power Plant in Seine Maritime, France. As the plant general manager, Ms. Gaujacq is in charge of day-to-day operations, supervising a staff of 650 employees. She has the authority to decide personnel actions and direct all negotiations with regional authorities on behalf of the plant, in addition to managing all business activities, as well as plant operating and maintenance costs.

Prior to her tenure at the Penly plant, Ms. Gaujacq held the same position (Site Vice-President/General Manager) at La Maxe Coal Fired Power Plant. Her duties were generally the same as those at Penly, but dealing with the properties of coal-generated fuel. She held the position from 1992 to 1994. From 1990 to 1992, Ms. Gaujacq was appointed Nuclear Inspector for Electricité de France's Nuclear Generation Division, where she conducted numerous evaluations of the management of safety at nuclear power plants in France and abroad. Prior to 1990, Ms. Gaujacq served as head of several Departments, including Shift Operations and Maintenance, at two different Electricité de France nuclear power plants.

The Qualifications of the Transferee

Ms. Gaujacq's education and her twenty years of experience within Electricité de France have left her well-prepared to fill her managerial duties as President of Electricité de France International North America, Inc. Her background at Electricité de France, where she enjoyed positions of increasing responsibility and, recently, has played a part in key policy-making decisions, demonstrates that she is ready to take on the position at issue. In addition to her extensive technical and managerial experiences at Electricité de France described above, it should be noted that Ms. Gaujacq earned her degree in engineering from the University of Nancy in 1977, and also has a Certificate in Business English.

In conclusion, Ms. Gaujacq's academic preparation and her distinguished 20 year career at Electricité de France, make her well-qualified to assume the position of President of Electricité de France International North America, Inc. Thank you for your assistance and courtesy in this matter.

Sincerely,

Richard T. Brien III
 Administrative Director

Re: Mrs Gaujacq

To Whom It May Concern

This is to confirm that Mrs GAUJACQ has been employed by Electricité de France (EDF) since 1980. Her 20 years of experience with EDF have included several managerial positions in varying responsibilities.

From 1994 to the present, Mrs Gaujacq has served as Site Vice President of PENLY Nuclear Power Plant. As plant general manager, she has the responsibility, through her subordinate staff, for approximately 650 employees. She exercises senior level discretion over day-to-day operations under her control, including the authority to decide personnel actions. She manages and directs all negotiations with regional authorities as well as business activities and is responsible for O and M costs (about 100 billion dollars a year) of the plant, including negotiations with contractors.

From 1992 to 1994, Mrs Gaujacq was Site Vice President of LA MAXE Coal Fired Power Plant. As plant general manager, she had the same kind of responsibilities than in PENLY, excepting naturally the responsibility of nuclear fuel property.

During her previous assignments in EDF, Mrs Gaujacq used to be Head of several Departments (operations on shift, maintenance) in different Nuclear Power Plants of Electricité de France and Nuclear Inspector for EDF Nuclear Generation Division.

Mrs Gaujacq's extensive managerial experience within EDF well qualify her for the key managerial assignment of President of Electricité de France International North America, Inc. and we ask your assistance in granting her the appropriate nonimmigrant status.

Should you have any questions regarding this matter, please do not hesitate to contact me. Thank you.

Faithfully,

Philippe MICHEL

Vice President of the Human
Resources Department
